 - Frequency

Known case of (k/c/o)

- Any current medical condition in the patient

On Observation

- General condition of patient
- Any deformity
- Posture
- Any external appliances
- Muscle wasting
- Tremor
- Skin colour
- Edema

On Examination

- **Vitals**
 - BP
 - Temperature
 - RR
 - HR
 - Spo₂
- GCS
- **Memory Examination**
 - Instant
 - Short term
 - Long term
- Speech
- Gait Examination
- Cranial Nerve examination
- **Sensory Assessment**
 - Superficial - Pain Touch Temperature
 - Deep - Pressure, Vibration, Joint position, Kinesthetic sense
 - Cortical
 - Stereognosis
 - Tactile localization
 - two point discrimination
 - Double simultaneous stimulation

On Examination

- **Motor Examination**

- Muscle tone
- MAS
- Voluntary Control
- Spasticity
- MMT

- **Reflex Examination**

- Superficial
- Deep

- Balance test
- Chest assessment
- Special Tests
- Radiological & Pathological examination
- Final diagnosis
- Treatment protocol
- Home exercise plan

Sedative Physio
